

How to maintain your Stressless leather furniture

All leather will last longer, look, & perform better when preventative maintenance is practised.

DO NOT USE any traditional household cleaning products to remove stubborn stains.

DO NOT USE a steamer to clean the leather

Certain cosmetics and body care products contain solvent and oils. These products **are not** beneficial to leather, as they may weaken the leather finish over time. Avoid using your leather furniture with wet hair or with freshly applied hair care products or cosmetics. To avoid build-up of these products, please regularly clean the leather as described below. The more leather is used the more it needs to be cleaned.

Weekly

- Maintain surface appearance and texture by gently wiping your leather with a clean dry cloth or vacuum with a soft brush. This will remove dust.

Weekly to Monthly – Dependent on the amount of ‘sitting’

- Pour the cleaner onto a soft sponge (not microfibre) and squeeze to make a foam. With small light circles clean the area paying particular attention to any stubborn marks. Rinse the sponge in clean water when it gets dirty.

TIP: The larger the sponge the faster the job will get done

- With a soft white cloth remove the excess foam and dirt
 - When you are satisfied with the cleaning result, leave the leather for 30 minutes before applying the Leather Protection which will renew the protection on the leather.
-

Leather Protection

Applying leather protection cream regularly is important because it maintains the moisture of the leather hide preventing it from drying out and cracking. It also provides a barrier to stains penetrating into the hide.

- Shake the bottle
- Pour a small amount onto a soft, clean cloth and apply to the leather surface evenly.
- Repeat on areas subject to heavy use such as the arms, seats, and headrest.
- Leave to dry for 30 minutes
- Buff the leather using a clean, soft cloth.

Replacement Stressless cleaning packs are available for leather and fabric as well as Ezycare 5_minute leather cleaner and conditioner
